Shows dialogue box for completing the sprint2

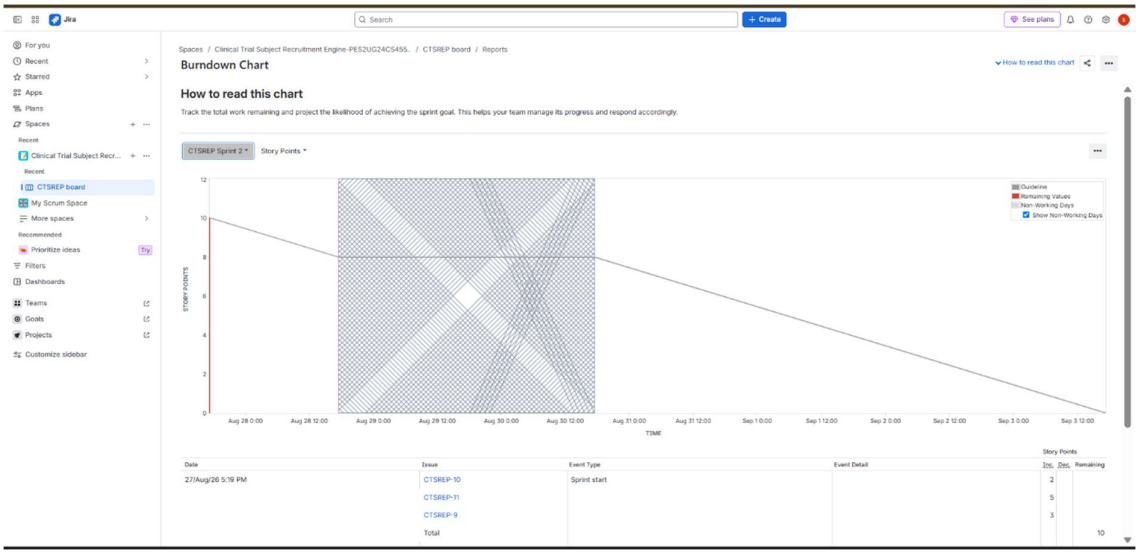

Shows the **Burndown Chart** representing the remaining work during the sprint.

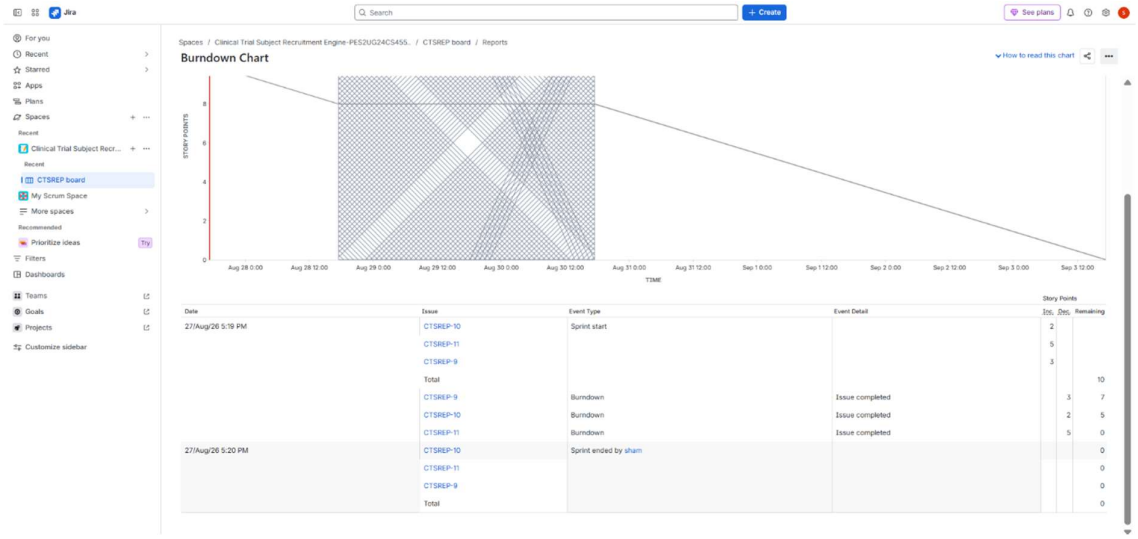

Shows the Burndown Chart with the sprint progress and story points over time.

Shows the final Burndown Chart and the remaining work decreasing towards the end of the sprint.

Reflection Questions:

1. Yes, the estimations were mostly close to the actual effort.
2. Yes, the backlog was prioritized properly. Important tasks related to grant management, publications, and financial auditing were given priority.
3. The sprint mostly followed the original plan. The planned work items were completed and moved through the different stages of the Jira board.
4. The burndown chart helped us understand how much work was completed and how much was remaining during the sprint. It also showed that the team was able to handle the planned workload within the sprint.
